Release-Notes

Congratulations, you have installed Autodiagnos DSI v4

What's new in Autodiagnos DSI v4?

- Version 4.1
 - o New vehicle coverage and features – see below
- Version 4.0
 - o Support for our new J2534 Approved VCI the Autodiagnos VCI²
 - o New vehicle coverage and features – see below

Autodiagnos DSI v3

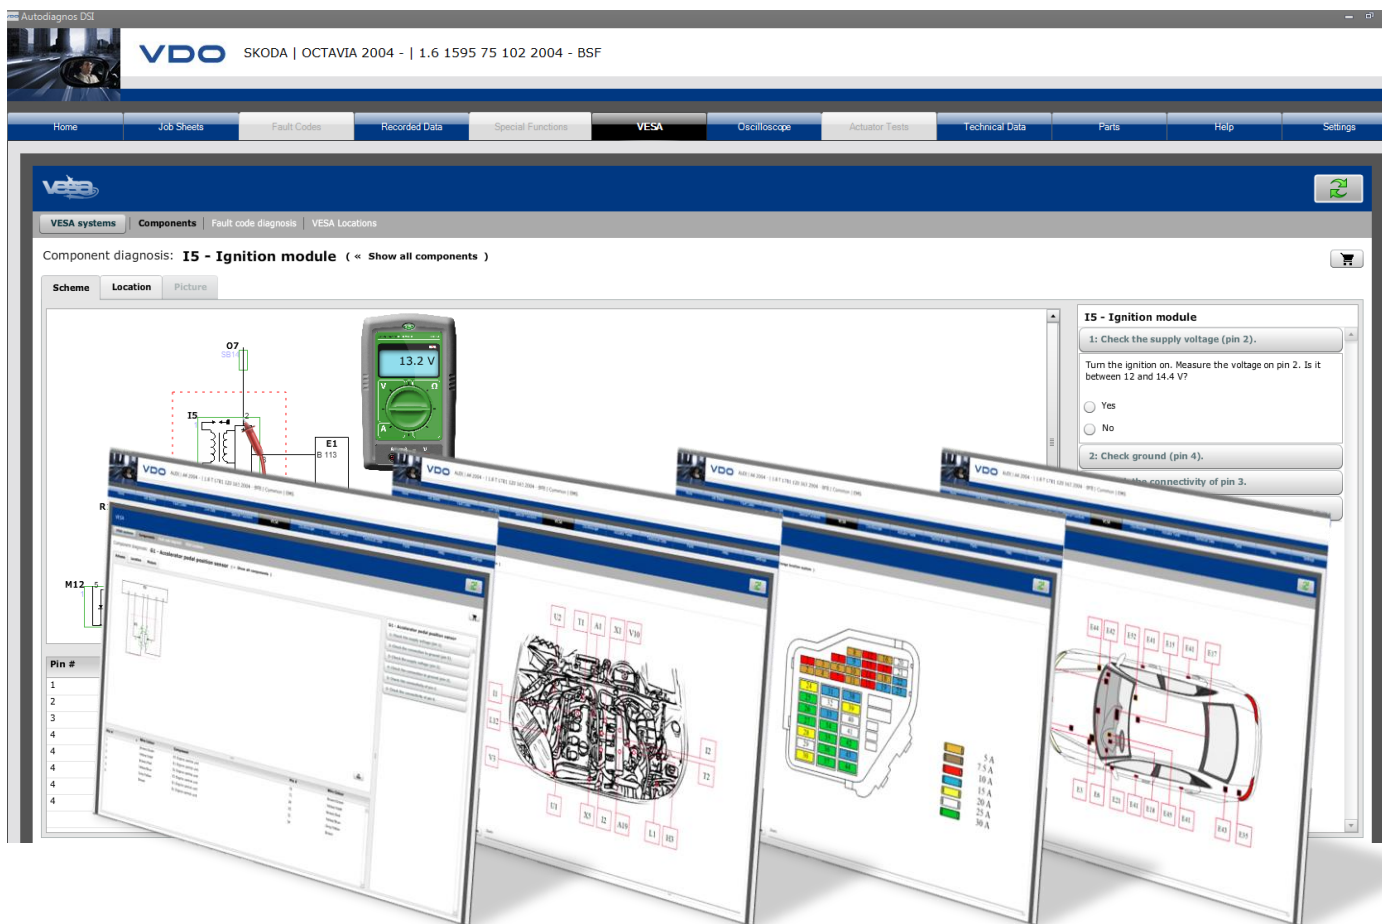

- Version v3.20
 - o New vehicle coverage and features
- Version v3.12
 - o HaynesPro VESA
 - o Technical Service Bulletins and Recall data
 - o Parts Catalogues and Technical Data Services
 - o Product Management Console
 - o New vehicle coverage and features
 - o Updated Operators Manual

HaynesPro VESA™

HaynesPro VESA™ (Vehicle Electronics Smart Assistant) is an innovative electronics diagnostics tool. Using data retrieved from the vehicle's CAN-Bus system, VESA helps mechanics to diagnose fault codes and component errors.

The module, which benefits from intelligent, step-by-step diagnostics, generates local component diagrams from a 'net list' and automatically generates type-specific diagnostic solutions whereby the fault code defines the most logical diagnostic path.

Since its introduction in 2010, **HaynesPro VESA™** has proven its value to both workshops and parts distributors. By offering HaynesPro VESA™ to the independent workshops, parts distributors have seen a significant reduction in returns of incorrectly ordered parts. HaynesPro VESA™ enables workshops to offer higher levels of service and reduce costs.

Components displayed in VESA can be viewed in detail, or purchased, using the integrated on-line parts catalogues.

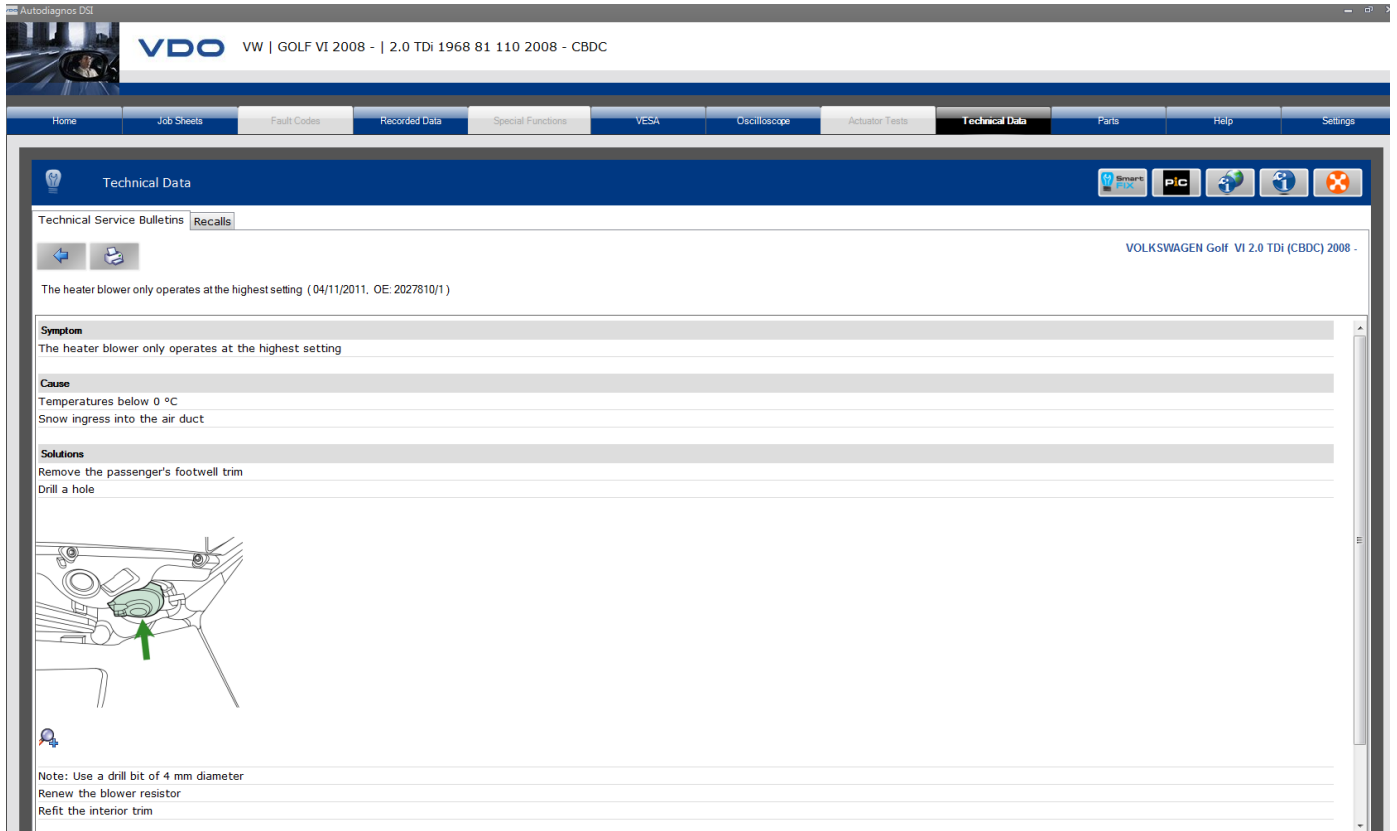

Click the 'Shopping Basket' icon when viewing a component, then select a parts catalogue from the displayed list.

Note: Parts catalogue availability may differ depending on product configuration and installed packages. Separate subscriptions may be required.

Technical Service Bulletins and Recall data

Autodiagnos v3 onwards integrates Technical Service Bulletins and Recall data from HaynesPro, containing all the information a workshop needs to repair common faults across a range of vehicles.

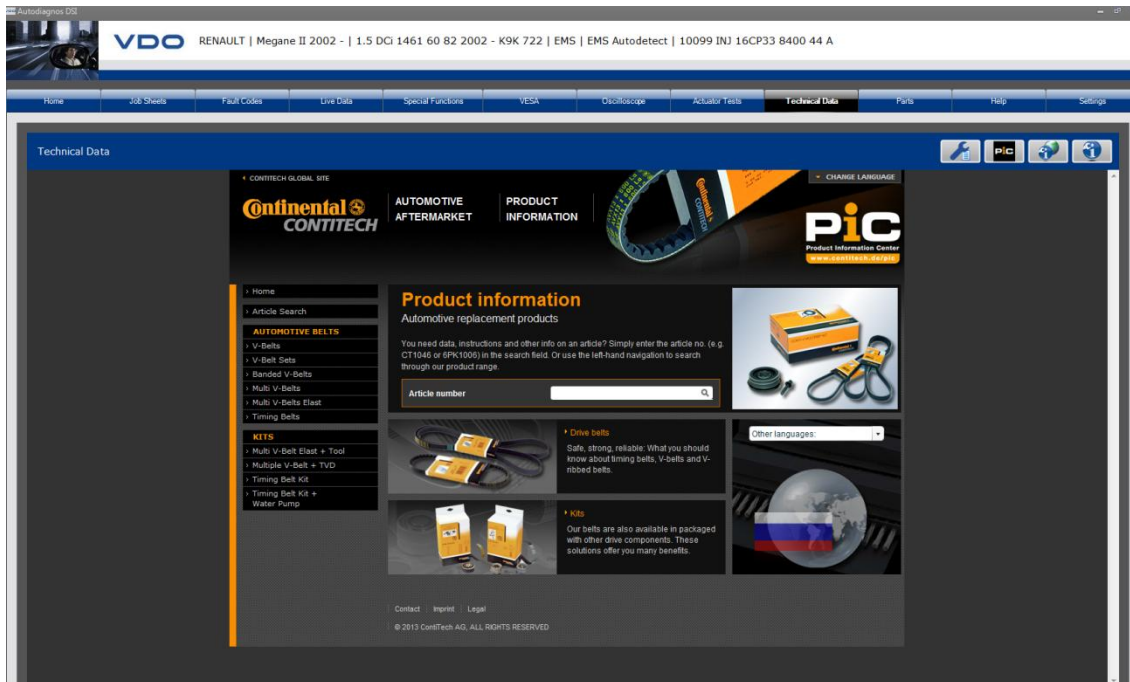

The bulletins specify the cause of the problem and offer a suitable solution, explained using standardized, straightforward language.

The Data is seamlessly integrated into Autodiagnos DSI and provides single click access to detailed information usually only known to the vehicle manufacturer.

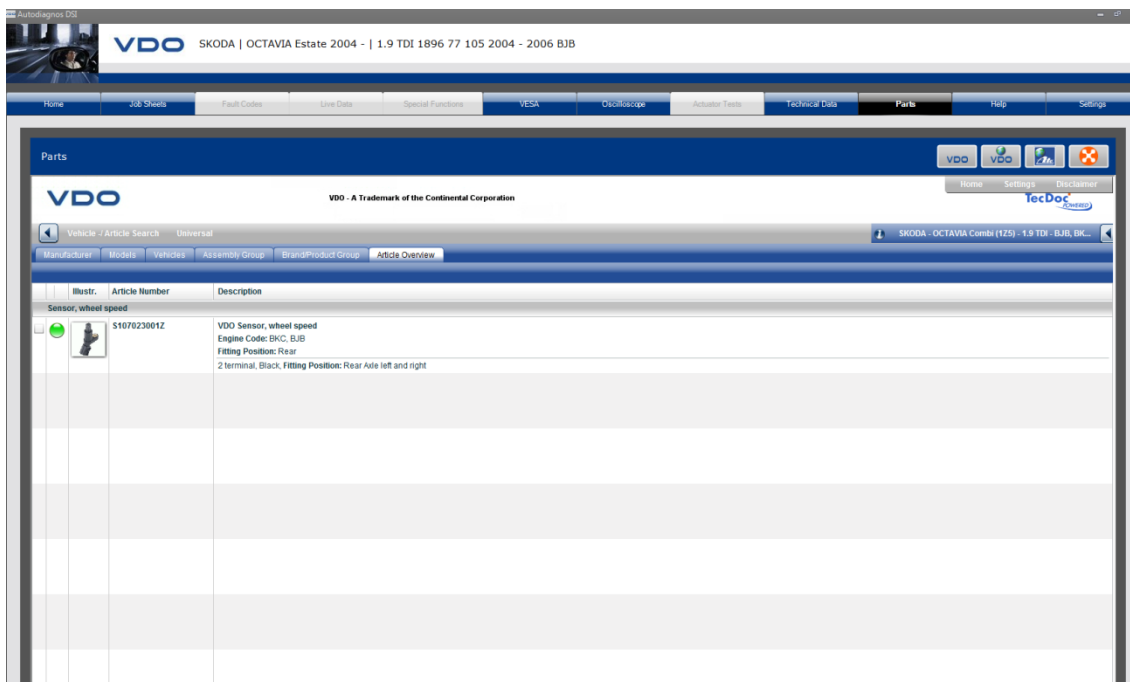

Data complies with the original OEM documentation and is presented in step-by-step instructions, reducing the amount of time required for fault diagnosis and the involvement of specialist dealers.

Parts Catalogues and Technical Data Services

Autodiagnos DSI has expanded its range of integrated on-line services to further increase our user's access to Technical Data articles and Parts Information.

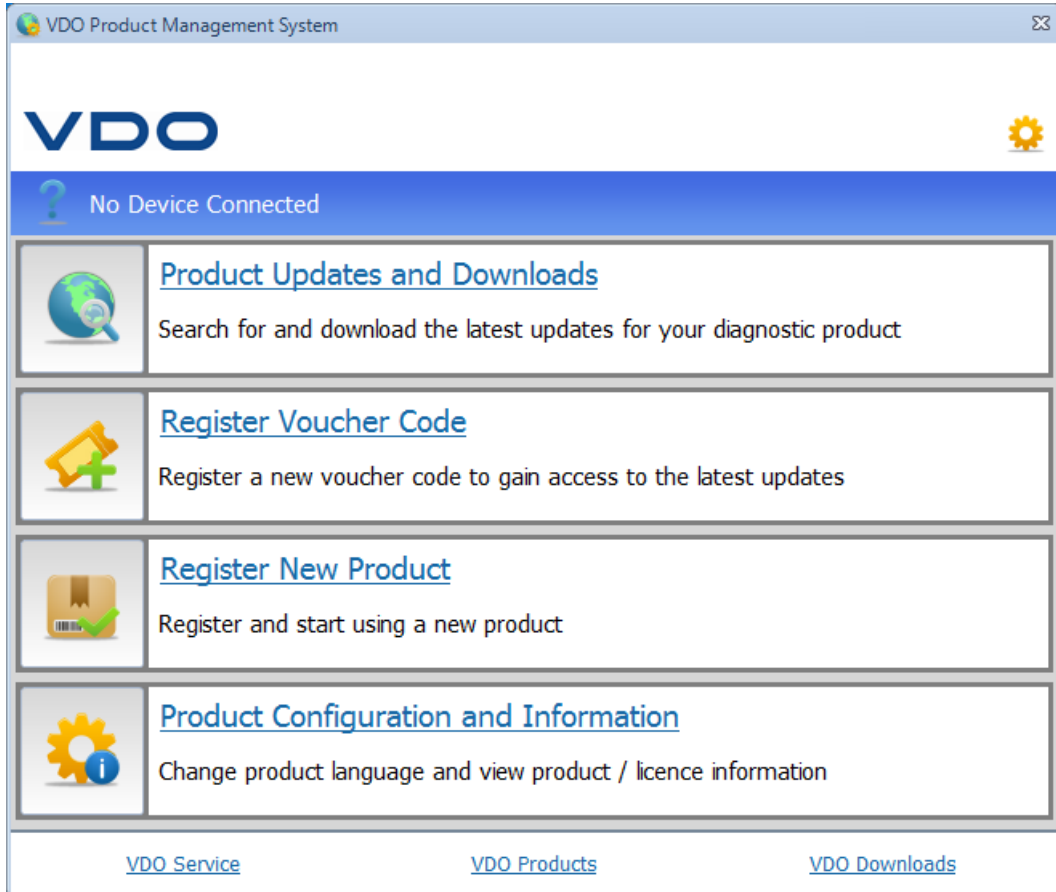

The Parts Information tab provides access to on-line parts catalogues where detailed information on components can be found.

Note: Parts catalogue availability may differ depending on product configuration and installed packages. Separate subscriptions may be required.

Product Management Console

The VDO Product Management Console can be accessed by clicking the icon in the windows quick launch area, or by launching VDO Product Management System from the Windows Start menu.

The VDO Product Management Console provides all the facilities required to manage your software and devices.

Use the interface to view details of your subscriptions and devices.

The software also provides easy functionality to register new devices and voucher codes.

The VDO Product Management Console will automatically provide on-screen notifications when updates are available for your products.

Updated Operators Manual

All the new features are described in greater detail in the *updated* Operators Manual which can be found on the 'Help' tab.

Systems

- ABS/SC
- EMS
- Parking
- Dashboard / Instruments
- LPG Injection
- SRS

Functions

New features and functions are dependent on the model and year:

- Actuators
- DPF pressure sensor reset
- Information
- MAF sensor reset
- Oil Change (Only for version with DPF)
- Oil Reset
- Post CAT lambda sensor reset
- Replace Air Flow Sensor (Only For Version With Lambda Sensor)
- Reset distance till next service
- Reset oil counter (DPF only)
- Reset phonic wheel
- Reset self learnt values
- Vehicle configuration deletion
- Autodetect
- Fault Codes
- Live Readings
- Oil Change
- Oil Change servicing information delete
- Phonic wheel learn reset
- Pre CAT lambda sensor reset
- Reset Adaptive Values
- Reset of self adaption
- Reset overboost counter
- Reset self adaption parameters
- Speed Limiter Programming
- Zeroing of self adaption parameters

Functions

New features and functions are dependent on the model and year:

- Actuators
- Diesel particle filter static regeneration
- Fault Codes
- Fuel Injector programming
- Live Readings
- Reset charge air cooler by-pass valve
- Reset differential pressure values
- Reset EGR valve learned values
- Reset exhaust gas temperature values
- Reset intake throttle learned values
- Reset knock sensor learned values
- Reset neutral gear position learned values
- Self test
- Autodetect
- DPF Regeneration
- Fuel injector correction factors
- Information
- Reset air throttle valve learned values
- Reset differential pressure values
- Reset DPF Learned Values
- Reset engine coolant fan learning
- Reset fuel metering valve values
- Reset KAM learned values
- Reset learned adaptations
- Reset water in fuel indicator
